

QUICK START GUIDE

Congratulations on your purchase at YourBuild!

Keep all the system packaging materials!

Without the original packing material, box and foam, it is not possible to send the PC back for service or warranty at our expense.

Let's get started!

1 Remove packing material:

For safe shipping, we have placed special protective material inside your PC. Remove this material before you connect and turn on the PC!

(Keep this protective material along with the other packaging materials.)

2 Connect the power cable:

Connect your power cable to the power supply and make sure the switch is in the 'I' position.

3 Connect the monitor(s):

Connect your monitor(s) using a DisplayPort or HDMI cable.

! Connect your monitor(s) exclusively to the GPU/graphics card.
(If there is no graphics card, then use the motherboard.)

Now that you have provided power and display to the computer, it's time to start it up. Do this before proceeding with the next steps.

4 Connect mouse & keyboard:

Connect your mouse & keyboard to the available USB ports.

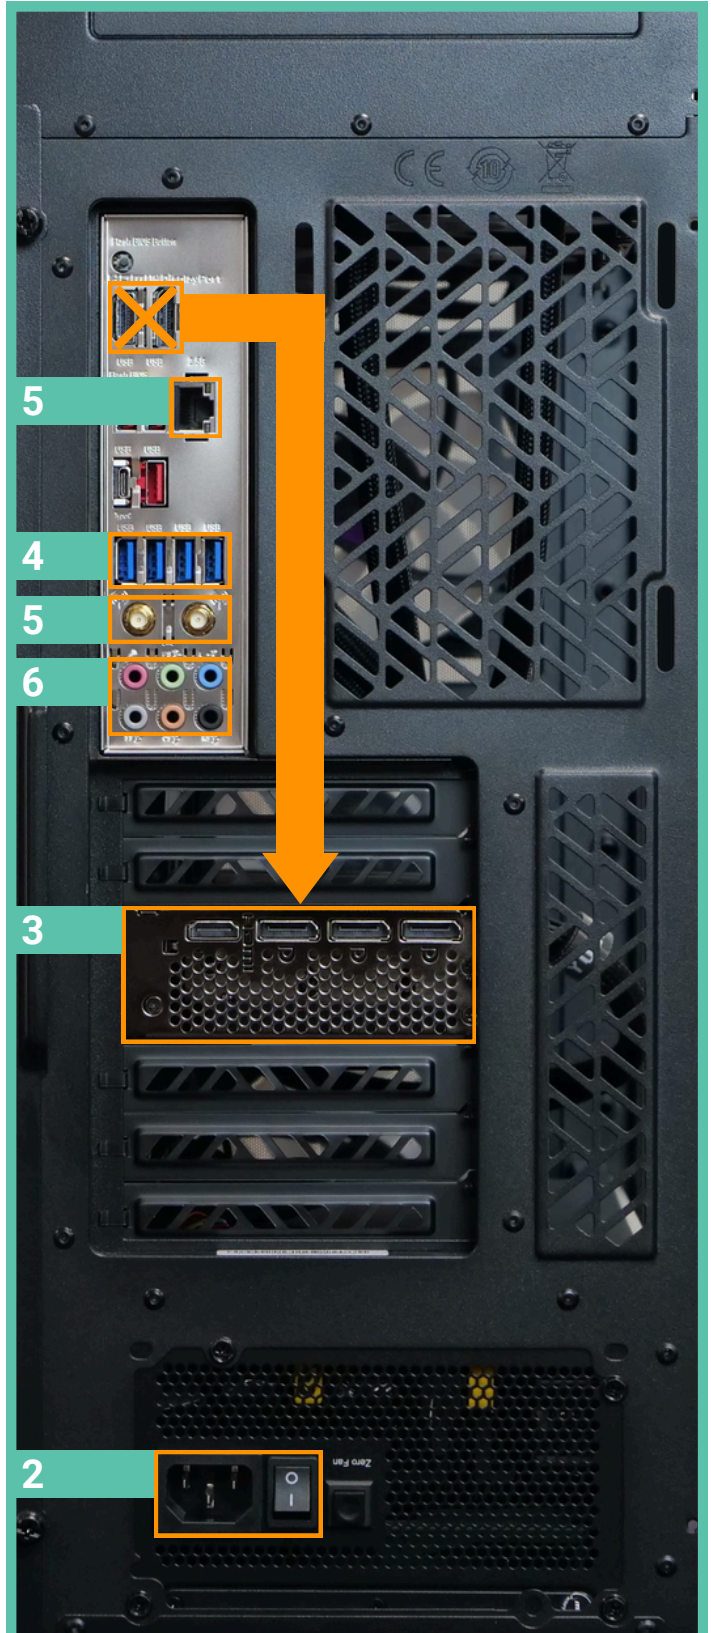

5 Connect to the internet:

Connect your internet cable to the ethernet port.

! Are you using WIFI/Bluetooth? Then connect the provided antenna(s).

6 Connect audio:

Connect your speaker and/or headphones to the audio ports.

Additional tips from YourBuild:

- **Standard programs:** All necessary programs are pre-installed and directly accessible from your desktop. These include programs for controlling RGB lighting and updating drivers.
- **Virus scanner:** There is no need to use an external virus scanner. Windows includes built-in security as a standard feature. In our experience, Windows security works better than third-party alternatives.
- **Monitor settings:** Double-check the advanced monitor settings to ensure that Windows recognizes the correct refresh rate (Hz) of your screen.
- **Dust:** Regularly clean the PC's dust filters to prevent excessive dust accumulation.
- **Need help?:** If you encounter any issues, feel free to contact us!

Hardware warranty

This warranty covers all hardware components of your PC. Each computer is thoroughly tested before delivery, ensuring optimal operation. Any hardware issues within the warranty period will be resolved by us at no extra cost to you.

Service

Do you have questions or need some help with your computer? We are here to assist you at no cost. That is the service you can expect from YourBuild. Whether it's optimizing game settings or providing expert advice on connecting peripherals, you can always WhatsApp, call, or email us.

Getting the system repaired

If you suspect that your system's hardware is defective, please contact us as soon as possible. In many cases, the problem is different than you expect and we can solve it remotely in many cases. However, if necessary, we may ask you to send the system to us for repair.

Therefore, we recommend keeping the packaging materials for shipping the system. This is the safest way to send the system.

Terms and Conditions

Our terms and conditions apply to all information and products offered on yourbuild.nl or other channels.

Scan the QR code for our complete terms and conditions:

Warranty exceptions

- Damage due to unskilled modification of the system.
- Damage due to moisture.
- Damage due to the effects of smoking/tobacco and leftover residue.
- Issues due to overclocking a system by yourself.
- Issues due to performing a BIOS update by yourself.
- Software errors (other than errors within Windows) or virus-related issues.
- Data loss.
